## DETAILED ACTION

### *Double Patenting*

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

**Claims 1-20 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-20 of prior U.S. Patent No. 6,708,589. This is a double patenting rejection.**

Application claims 1 and 12 and patent claims 1 and 12 are nearly identical in claim language, with the exception being that the patent claims explicitly recite the components of the brake assembly in the preamble of both claims (i.e. said brake assembly comprising a wheel hub, a knuckle and a brake rotor). However, the scope of the claims is identical. Further, it is evident from the method steps recited in the application claims that the brake assembly comprises at least the components recited in the claims (a wheel hub, a knuckle and a brake rotor).

Application claims 2-11 and 13-20 are nearly identical to patent claims 2-11 and 13-20, the only differences being the occasional recitation of "a" in the application claims, where "said" was recited in the patent claims. The scope of the claims is identical.
